# mk QuickDesigner Guarding

mk-group.com/service

Design and configure your perimeter guard

mk QuickDesigner
Guarding

Guarding configurator
## *incl. CAD library*

Use the mk QuickDesigner to quickly and easily design individual distance guardings without a CAD system or CAD knowledge. You can reduce the processing time by up to 80% by using the configurator. Generate the request or order documents with the click of a mouse; thus eliminating a double entry.

Under www.mk-group.com/service you get the software for free download. We are happy to support you on site by an introductory training – please contact us.

The CAD parts library included in the software package provides you CAD data, in the original format (STEP, IGES, DXF, DWG). Our CAD data are also available at www.mk-group.com for direct download, via email or DirectToCad to your CAD system in all common native formats.
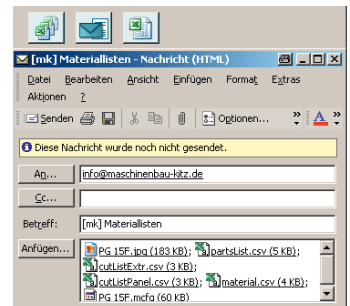

Upgrade functions

- Variable angles in combination with posts and fields for angle ranges from 0° to 135°
- Automated control of the floor mounting brackets
- Full or half floor mounting brackets and end caps can be manually selected and combined
- Post-panel method: Optional end caps allow for quick disassembly by straight connecting plates
- Update of the design and development status for models, parts lists and component limits

Functions and advantages

- Reduction in development and engineering time
- Large selection of paneling and door variants
- Reduced costs by the use of standardized components
- No CAD system or CAD knowledge required
- Design with intuitive user guidance in three dimensions
- Automatically from the 2D layout to the 3D model
- Option to import DXF layouts
- Export of 3D drawings in IGES, STEP and JPEG format
- Automatic generation of individual part and assembly BOMs, saw lists and weight estimates
- Direct replacement, examination and modification via email
- Degree of assembly freely selectable (raw material, assemblies, turnkey)
