

Information on activities involving exposure to ionising radiation dated 11.07.2024

In accordance with the Atomic Law Act (Journal of Laws 2023, item 1173) art. 32c. item.2, the manager of an organisational unit carrying out activities involving exposure to ionising radiation shall post on the website of the organisational unit, at least every 12 months, information on the impact of the activities carried out by the organisational unit on human health and the environment, and on the magnitude and isotopic composition of releases of radioactive substances into the environment in connection with the performance of such activities.

Information on the impact of the activities carried out by Archimedes sp. z o.o. on human health and the environment for the past year.

On the basis of the measurements and calculated doses, it is concluded that the activities related to exposure to ionising radiation in the past 12 months have had no negative impact on human health and the environment.

Archimedes Radiation Protection Supervisor
